

EVI component analysis

Component: Sensitivity

LEGEND

Class on the EVI scale

- Class 1 · Very low
(not present in this extent)
- Class 2 · Low
- Class 3 · High
(not present in this extent)
- Class 4 · Very high
(not present in this extent)

Primorsko municipality boundary

Sensitivity characterises the internal susceptibility of the system (ecosystem condition, land use, human pressure). A higher class means higher sensitivity. Across Primorsko this layer is relatively homogeneous.
